Session 2

Homework 1

5 October 2010

Problem 1

Some work here

And we have a winner

Problem 2

How about a multi-part problem?

a)

Start a problem

And answer	a)

b)

Or potentially: $Answer\ without\ the\ section\ reference$

But be warned - that puts it into math mode - maybe someone can make that a little nicer

c)

How about a section which...

Goes on multiple pages - check out the footer...

Cool	c)

Problem 3

There's a lot more that LaTeX will let you do of course, so have fun and contribute! There's plenty of comments in the code to check out.
